

GOLDBERG BROTHERS

BARN DOOR HARDWARE

BARNFOLD® SIZING TABLE

ORIGINAL (MEDIUM DUTY) BARNFOLD® 2-DOOR CONFIGURATIONS

- To install a Barnfold® Series 2-door system, you must have a minimum of 5" of clear space above the finished opening.
- The two matching doors should be at least as tall as the height of the finished opening.
- The combined width of the two doors should be at least 2" more than the width of the finished opening to allow a wall overlap of at least 1" on each side when the doors are closed. For a completely clear opening when the doors are folded open, the combined width of the two door panels should be at least 6" more than the width of the finished opening, providing a 5" wall overlap on the side where the doors will fold open and a 1" wall overlap on the other side.
- The track should be twice the length of one door panel. If necessary, you can purchase a hardware set with a track longer than you need and have the track custom-cut at our factory.
- Original (Medium Duty) Barnfold® hardware sets are made to fit doors 1¼" to 1⅜" thick. Adapter kits are available for doors 1½" to 1¾" thick.

Use the table below to match the finished opening width with the recommended door panel width and track length. The two columns on the right indicate the catalog numbers of the available 2-door original (medium duty) Barnfold® hardware sets. Hardware sets can also be purchased without track.

BASED ON FINISHED OPENING WIDTH

LESS THAN CLEAR OPENING

The stacked doors will hang over into the opening up to 4" in the fully opened position, with a minimum wall overlap of 1" on each side when fully closed.

CLEAR OPENING

The stacked doors will not hang over into the opening in the fully opened position, with a minimum wall overlap of 5" on the stacking side and 1" on the closing side.

GOLDBERG BROTHERS

BARN DOOR HARDWARE

BARNFOLD® SIZING TABLE

ORIGINAL (MEDIUM DUTY) BARNFOLD® 4-DOOR CONFIGURATIONS

- To install a Barnfold® Series 4-door system, you must have a minimum of 5" of clear space above the finished opening.
- The four matching doors should be at least as tall as the height of the finished opening.
- The combined width of the four doors should be at least 2" more than the width of the finished opening to allow a wall overlap of at least 1" on each side when the doors are closed. For a completely clear opening when the doors are folded open, the combined width of the four door panels should be at least 10" more than the width of the finished opening, providing a 5" wall overlap on each side.
- The track should be four times the length of one door panel. If necessary, you can purchase a hardware set with a track longer than you need and have the track custom-cut at our factory.
- Original (Medium Duty) Barnfold® hardware sets are made to fit doors 1¼" to 1¾" thick. Adapter kits are available for doors 1½" to 1¾" thick.

Use the table below to match the finished opening width with the recommended door panel width and track length. The two columns on the right indicate the catalog numbers of the available 4-door original (medium duty) Barnfold® hardware sets. Hardware sets can also be purchased without track.

BARN DOOR HARDWARE

BARNFOLD® SIZING TABLE

HEAVY DUTY BARNFOLD® HD 2-DOOR CONFIGURATIONS

- To install a Barnfold® Series 2-door system, you must have a minimum of 5" of clear space above the finished opening.
- The two matching doors should be at least as tall as the height of the finished opening.
- The combined width of the two doors should be at least 2" more than the width of the finished opening to allow a wall overlap of at least 1" on each side when the doors are closed. For a completely clear opening when the doors are folded open, the combined width of the two door panels should be at least 6" more than the width of the finished opening, providing a 5" wall overlap on the side where the doors will fold open and a 1" wall overlap on the other side.
- The track should be twice the length of one door panel. If necessary, you can purchase a hardware set with a track longer than you need and have the track custom-cut at our factory.
- Barnfold® HD J-strap hardware sets are made in two sizes to fit doors 1¼" to 1½" thick, or up to 2¼" thick. Barnfold HD top mount hardware sets can be used with most doors least 1½" thick.

Use the table below to match the finished opening width with the recommended door panel width and track length. The three columns on the right indicate the catalog numbers of the available 2-door Barnfold® HD hardware sets. Hardware sets can also be purchased without track.

LESS THAN CLEAR OPENING

The stacked doors will hang over into the opening up to 4" in the fully opened position, with a minimum wall overlap of 1" on each side when fully closed.

CLEAR OPENING

The stacked doors will not hang over into the opening in the fully opened position, with a minimum wall overlap of 5" on the stacking side and 1" on the closing side.

GOLDBERG BROTHERS

BARN DOOR HARDWARE

BARNFOLD® SIZING TABLE

HEAVY DUTY BARNFOLD® HD 4-DOOR CONFIGURATIONS

- To install a Barnfold® Series 4-door system, you must have a minimum of 5" of clear space above the finished opening.
- The four matching doors should be at least as tall as the height of the finished opening.
- The combined width of the four doors should be at least 2" more than the width of the finished opening to allow a wall overlap of at least 1" on each side when the doors are closed. For a completely clear opening when the doors are folded open, the combined width of the four door panels should be at least 10" more than the width of the finished opening, providing a 5" wall overlap on each side.
- The track should be four times the length of one door panel. If necessary, you can purchase a hardware set with a track longer than you need and have the track custom-cut at our factory.
- Barnfold® HD J-strap hardware sets are made in two sizes to fit doors 1¼" to 1½" thick, or up to 2¼" thick. Barnfold HD top mount hardware sets can be used with most doors at least 1½" thick.

Use the table below to match the finished opening width with the recommended door panel width and track length. The three columns on the right indicate the catalog numbers of the available 4-door Barnfold® HD hardware sets. Hardware sets can also be purchased without track.

BASED ON FINISHED OPENING WIDTH

door/wall overlap finished opening	1"+1" wall overlap (up to 4" of each stacked pair of doors remain in opening)	3"+3" wall overlap (up to 2" of each pair of stacked doors remain in opening)	CLEAR OPENING 5"+5" wall overlap

LESS THAN CLEAR OPENING

CLEAR OPENING

The stacked doors will hang over into the opening up to 4" in the fully opened position, with a minimum wall overlap of 1" on each side when fully closed.

The stacked doors will not hang over into the opening in the fully opened position, with a minimum wall overlap of 5" on each side.
